4375567042
Toronto, ON, Canada

Proactive software engineer with experience in full-stack development. Skilled in JavaScript frameworks like mern stack, nextjs, Python, algorithms, and software best practices. Passionate about contributing to production-level code and open-source projects while collaborating with experienced engineers.

Work Experience

Software Developer Intern
AasmaTech | Ahmedabad

Jun 2023 - Nov 2023

- Developed a full-stack web application using the MERN stack, focusing on multi-role authentication and security.
- Managed state efficiently in React using the Context API.
- Built secure RESTful APIs with Express, implementing token-based authentication for enhanced security.
- Designed and implemented responsive user interfaces using Tailwind CSS.

Junior React Developer
WebTech Crew | Ahmedabad

Jan 2022 - May 2023

- Developed and maintained React applications, ensuring high-quality code and performance optimization.
- Collaborated with team members to troubleshoot and resolve technical issues using industry best practices.
- Specialized in React state management with Redux to build scalable and efficient applications.
- Integrated Firebase v9 with React to enhance functionality and streamline data management.

Projects

Hulu Clone

Present

Developed a Next.js application that fetches movie data from TheMovieDB API based on selected categories.
Designed a responsive and dynamic layout using Tailwind CSS.
